Options

- A wide array of machine configurations are available. Customising these machines according to your needs is our forte.

VendAssure™

Eliminating issues with refunds from vending machines, VendAssure™ is a wonderful system incorporated in these machines that uses invisible light beams above the product retrieval compartment. Should a product fail to fall into the retrieval compartment, the motor will turn two more times. If the product still doesn't fall into the retrieval chamber, then the customer will be prompted to make another selection or else, he will receive a refund. VendAssure™ is instrumental in reducing service calls and customer complaints for refund.
